• Sonora, Mexico

Summary

Software Engineer focused on the design, development, and deployment of scalable and efficient web applications. Specialized in the JavaScript/TypeScript ecosystem, with hands-on experience in creating dynamic user interfaces, backend architectures, and process automation. Proven ability to take projects from conceptualization to production on modern cloud platforms

Key Achievements

 Enterprise API Developed I developed an enterprise REST API used in three commercial applications, improving data integration.	 Unified System Implemented I implemented a unified system, reducing duplicate orders in cross-sales by 25%.	 Successful CI/CD Optimization I optimized the CI/CD deployment process, reducing release times by 50%.

Experience

Akora Full Stack Developer	Navojoa Sonora 03/2025 - Present (Freelancer)
- Unified e-commerce, POS, KDS, and administration into a single full-stack platform with Angular 17, NestJS, and PostgreSQL, enhancing operational efficiency. - Delivered a secure, real-time central REST API with JWT auth, role-based access, WebSockets, and validated OWASP-aligned inputs, streamlining platform operations. - Integrated Open pay/BBVA for online payment processing, implementing 3-D Secure, webhooks, refunds, and alerts, ensuring bank-grade transaction security. - Implemented CI/CD using GitHub Actions and Docker, improving deployment reliability and cutting release effort across staging and production environments. - Developed a production-ready platform to unify online and in-store sales, eliminating duplicate order entry and streamlining workflows. - Reduced cash discrepancies with shift-based reconciliation and traceability, replacing paper tracking with digital solutions. - Enhanced system monitoring and issue diagnosis by incorporating Sentry monitoring and structured logging for real-time failure detection.	
Dairy Barn Full Stack Developer	Navojoa Sonora 07/2025 - Present (Freelancer)
- Took the product from requirements to installable release, turning ranch needs into a deployable system with defined scope, architecture, testing, and rollout. - Replaced notebooks and spreadsheets with a single operational system covering herd management, reproduction, milk production, animal health, feeding, and milk sales. - Improved day-to-day usability in corral environments by designing task-focused screens built for repetitive field work instead of desk-based workflows. - Made daily operations resilient without internet access by building the system to run fully offline with local storage and verified automatic backups. - Reduced the risk of contaminating the full milk batch by automating medication withdrawal control before treated animals' milk entered the tank. - Automated operational metrics: reproduction indicators, lactation projections, cost per liter, procurement pricing.	

Education

ITSON Software Engineer Current Student	Sonora 08/2023 - 08/2027
Software Engineer specializing in full-stack development with Node.js, Angular, and Next.js. Experienced in designing scalable architectures, developing APIs, and automating web processes. Focused on delivering efficient solutions from conceptualization through to cloud deployment	

Skills

Technical Skills:
Languages: TypeScript, JavaScript, SQL, HTML5, CSS3, Java, C++, Python · Frontend: React, Angular, Tailwind CSS, Vite, RxJS, responsive design · Backend: Node.js, NestJS, Express, REST APIs, WebSockets, JWT authentication, role-based access control · Databases: PostgreSQL, SQLite, Prisma, Drizzle ORM, relational modeling, migrations · Testing: Jest, Vitest, unit, integration, and end-to-end testing · DevOps: Docker, GitHub Actions (CI/CD), Nginx, AWS, VPS deployment · Other: Git, Electron, payment gateway integration, applied security (OWASP), ESLint, Prettier · Cloud/DevOps (Docker/AWS) · Agile/Scrum methodologies · System design principles · Code review practices · Performance optimization

Additional Skills: Technical troubleshooting · Analytical thinking · Project management · Automation development and digital content creation
